Nutanix™ Enterprise Cloud with HPE® ProLiant® DX Systems

Nutanix on HPE® ProLiant® DX Appliances Provide Powerful Turnkey Building Blocks for Your Enterprise Cloud

USE CASES

Cloud:
Deliver an efficient private and hybrid cloud with Nutanix Calm, VMware®, Microsoft® or OpenStack® based solutions.

End User Computing:
Make virtual desktop infrastructure (VDI) a success by delivering excellent user performance and scalability without burdensome operational and high capital costs.

Databases and Enterprise Applications:
Deploy and scale your critical workloads, such as Microsoft® SQL, Oracle® and SAP® business applications.

Big Data Analytics:
Applications linearly scale as your needs grow, enabling a pay-asyou-grow model for scaling without overprovisioning compute or storage.

Data Protection:
Full remote replication plus back up VMs and data to your local systems, to a remote site or the cloud.

Messaging, Collaboration and UC:
Proven deployments for Microsoft Exchange®, collaboration tools such as SharePoint® and major Unified Communications vendors, including Avaya®, Cisco®, and Microsoft®.

Development & Test:
Engineering and QA get their own efficient high-performance VMs with access to private copies of production databases and data.

The Nutanix™ and HPE® partnership enables IT teams to move up to the full benefits of on-premises cloud computing environments to nimbly and efficiently keep pace with the application needs of their business. With the Nutanix Enterprise Cloud software factory pre-installed on HPE® ProLiant® DX systems, customers can run any workload at any scale and instantly provision their own private or hybrid cloud.

Nutanix Enterprise Cloud software leads the industry with a combination of multiple hypervisor support, advanced data optimization, web-scale design including scale-out storage services, predictive capacity planning, one-click lifecycle management upgrades and much more.

HPE® ProLiant® DX systems have been extensively tested and certified jointly by Nutanix and HPE® to run business-critical applications at scale on Nutanix Acropolis™, AHV™ and Prism™ software. Deployments are fully supported by HPE® for hardware, and Nutanix™ for the software, covering the entire IT from initial installation, infrastructure upgrades, scaling and troubleshooting.

SOLUTION BENEFITS

IT Efficiency
Decrease infrastructure footprint by converging compute, storage and virtualization. Consolidating application infrastructure silos reduces infrastructure, power, space and cooling costs.

Fast Time-to-Value
Nutanix Acropolis OS and AHV software is factory pre-installed on HPE® DX systems enabling fast and simple infrastructure deployments.

Scale to Meet Growing Demands
Additional storage capacity and compute can be added quickly with predictable results.

Simple Management
One-click non-disruptive lifecycle management of Nutanix software, hypervisor and HPE Service Pack for ProLiant (SPP) firmware. Manage the entire HPE system infrastructure as one in Nutanix Prism.

NUTANIX

Provides the Highest Availability

Infrastructure self-heals from drive and server failures—critical for environments where service may be delayed. Software and firmware updates are simple and non-disruptive.

Wide Platform Configurability

Configure-to-order HPE ProLiant® DX systems options includes wide array of processors, memory, storage types and capacities.

### Offers Unparalleled Performance & Efficiency

Advanced industry standard x86 processors and dense flash storage, couple with Nutanix web-scale design deliver predictable performance for a widerange of industry workloads, including those in financial services, healthcare and manufacturing.

Enables Customer Choice [†]

Select your hypervisor of choice, from the pre-installed Nutanix AHV, VMware ESXi™ or Microsoft Hyper-V™.
