

Nutanix on HPE servers in 30 seconds

Why?

Invisible Infrastructure

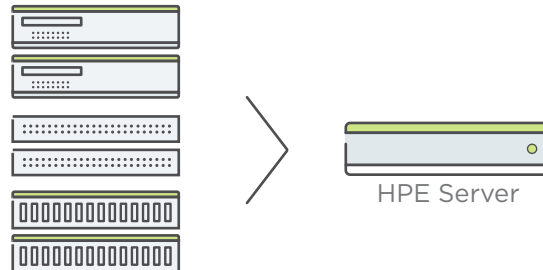

Nutanix is on a mission to make datacenter infrastructure invisible, elevating IT to focus on applications and services.

What?

Enterprise Cloud Platform

Nutanix natively converges compute, storage and virtualization into a turnkey enterprise cloud platform that can be deployed in 30-60 minutes, and runs any app at any scale.

How?

Web-Scale

The Nutanix Enterprise Cloud Platform is uniquely built using web-scale technologies and architectures that originated in large Internet companies such as Google, Facebook and Amazon and delivers cloud-like agility and lower costs.

HPE® is a registered trademark of HPE®.
